

Q8 - Branding

How to brand your account for a logo, colors and sub-domain, enabling drag & drop and forcing FTPS

See the [QuickStart Contents](#) for further information on setup details

1- Go to the Account→Home page to brand your sub-domain and account level signature
Contacts can reach you by yourdomain.hostedftp.com

Home Files Contacts Users Plugin Setup **Account**

Home Usage

Subdomain .hostedftp.com

Usage Storage 57 MB Bandwidth 11 MB

2 Go to the Setup→Home page to brand user level signature
Account level signature applies to activation emails

Signature

Options

- Enable drag and drop
- Force FTPS for all users
- Delete mail after days
- Show mail in FTP folder
- Save import results in FTP folder
- Notify me when sent files are
- Ask a security question during password reset

Question

Answer

- Add an attach

3- Apply options for your account
Enable drag and drop for quick copy and paste, force FTPS for FTP client users and enable view of FTP mail in folder view

4- Apply branding with your own logo and color scheme (click [here](#) for more details)
Useful to provide a more private method of collaborative access when you have knowledge of contact email info. Contacts manage their own passwords and activation.

Thank you for joining the Hosted-FTP~ webinar series or support sessions. In these webinars we can go through your particular business use case(s) and setup/configure your trial account for your use. This accomplishes some key objectives:
1) it accelerates your setup and configuration tailored to your specific requirements
2) it provides you with the opportunity to interact with our specialists and clarify how any features work
3) it removes any potential guesswork on how our service may meet your needs and gives you the ability to make a more informed decision.
